Disc Brake Pads

BRAKE COMPONENTS

GOLDfren brake components are dedicated to ultralight aircrafts. Their brake efficiency markedly exceeds the OEM brake components performance and by this they assure not only greater safety but also landing on the shortest runway. **GOLDfren** brake lining is made of sintered materials and does not contain dangerous asbestos or lead. Brake linings material compositions do not cause excessive brake disc wear.

We recommend using our brake pads along with **GOLDfren brake discs**. **GOLDfren brake discs** are made of high quality stainless steel which is resistant to high load and contrary weather conditions.

With **GOLDfren brake components**, you can reach high quality and perfect braking performance for reasonable price!

Pads production in our factory
